Swahili (advanced)

SUMMARY

I am highly motivated, persistent, a quick learner, who loves problems solving, and a team player. I am up for a challenge, enthusiastic, ready to go above and beyond, and always open and intrigued by learning other technologies.

When I am not coding or doing something on my laptop, you will find me outside, enjoying the weather, running in the park or out with my friends.

JOB EXPERIENCES

Frontend Engineer

ON, ZURICH | July 2020 - July 2023

Worked as a frontend engineer for on-running.com and customer-service.on-running.com. I worked in a cross-functional scrum team of 7+ people, with biweekly sprints. I used Jira as a ticket management tool and Confluence for holding the documentation. Our code is hosted in Github.

- Worked on a library of shared components used by multiple team teams:
  - The library is integrated with our CMS system to allow content editors to customize the content of the website
  - The library has qualitative test coverage and is showcased through Storybook
- Implemented reusable UI components and Storybook stories following the design
- Planned & delivered complex features for the website MVP go-live and followed incremental deliveries within an agile scrum environment
- Wrote and maintained unit tests using Jest to ensure the quality of the codebase
- Created and maintained content models and entries for our CMS Contentful to manage content and improve editorial workflows
- Worked on accessibility topics to adhere to AA wcag standards
- Lead reskinning of our existing customer service application to adhere to the new website design
- Implemented tracking for Google Tag Manager and Dynamic Yield to measure performance
- Lead the scrum ceremonies as part of the biweekly scrum master rotation
- Involved in automated e2e testing activities and as technical in solutions for new features

Frameworks and tools: VueJs with Composition API, Nuxt.js, Typescript, HTML, SCSS, Graphql, Storybook, Jest, Contentful

JEAN CEDRIC NTWARI

Software Engineer

SKILLS

JavaScript	UI / UX
TypeScript	CSS modules
Vue.js	Jenkins
Nuxt.js	Jest
GraphQl	Debugging
HTML	GIT
CSS3	JavaServer Faces

HOBBIES

Skiing Hiking Running

Cooking Photography Traveling

JOB EXPERIENCES

Freelancer Web Developer

FREELANCE, Burundi| 10/2014 - 02/2015
